PRIVACY POLICY

CONTINUITY OF CARE

Patients are considered patients of the practice and the Practice will provide continuity of care for our patients. When a routine appointment request is made by a patient, it is the policy of this practice to ask which Doctor they would prefer to see. We will offer the next available appointment with that Doctor. If this appointment is unsuitable, the patient will be given an alternative appointment with another Doctor at a time more suitable to the patient. Patient Health information is available to other authorised members of staff through shared electronic medical records.

PERSONAL HEALTH INFORMATION AND TEST RESULTS

All personal health information is treated with utmost confidentiality by all staff. To ensure this, all results are communicated BY the Doctor TO the patient by mail as soon as possible, and if the Doctor deems necessary, by phone. The transfer of test results from other medical organisations can sometimes be compromised, so patients will be requested to follow up with their doctor if a result has not been advised to them within 2 weeks.

At times, our practice provides results via email. Our email system is only used to communicate normal results to our patients. Please bear in mind that email communication may be compromised if you have email without encryption. If you do not wish to receive communication from your Doctor via email, please advise Reception. Please note this email system is a read only system and cannot be used to communicate with your Doctor.

TRANSFER OF MEDICAL RECORDS

If you wish to transfer your health record to another service provider please ask your new provider to send The Health Care Centre a transfer application form signed by you. Alternatively if you would like The Health Care Centre to obtain records from another service provider please see reception for a transfer application. Depending on the method of transfer and postage a fee of \$33.00 (inc. GST) may be charged to forward the complete patient file. If this fee is payable, you will be contacted before the transfer is made.

REMINDER AND RECALL SYSTEMS

This Practice uses a 'Recall and Reminder' system to recall and remind patients about clinically significant results and preventative care issues. Privacy laws require that we obtain your consent to send you these reminders. All doctors follow the guidelines for preventative care as outlined by the RACGP's guidelines, which are in line with the recommendations of organisations such as the National Heart Foundation, National Cervical Screening and Breast Screen.
